Bhadravati, P.O.

No. 749 30th March 1922.

Dear Mr. Mirza,

I have received your letter of the 26th Instant regarding Mr. Chakravarti's enquiry.

As you know, it is still undecided when the Plant will be started up for Operation, and until that time the question of recruitment has to be kept in abeyance. If you agree Mr. Chakravarti may be informed that we shall communicate with him when operation starts.

There are three princip al lines of employment here, namely, Mechanical, Chemical and Metallurgical, and training in any one of these lines for which the boy may have aptitude will certainly stand him in good stead in starting business ofhis own. If he intends to start, say a small Saw Mill or Foundry or Soap Factory or Paint Works, the training here is certain to come in handy.

If it is Mr. Chakravarti's intention to secure employment for his son and not to start him on independent business, the best thing he could is to try and secure him admission into the Technological Institute at Jamshedpur. The next selection, I think, will take place at the end of this year and good positions are guaranteed to bright candidates. A copy of the rules may be obtained from the Director of the Technological Institute.

I am conscious that my reply cannot be as helpful as might be desired but in our present situation and with the meagre particulars furnished by Mr. Chakravarti, I do not think we can say anything more definite.

With kind regards,

Yours sincerely,

" Copy " Sd/ N. Madhava Rao.
